FINAL BUDGET

**FOREST LAKES
METROPOLITAN DISTRICT
LGID: 34011**

2019 BUDGET MESSAGE

DISTRICT SERVICES

The District was incorporated on July 18, 1973 and authorized to construct, operate and maintain water, sanitation, street improvements, parks and recreation facilities for the residents of Forest Lakes.

BASIS OF ACCOUNTING

The basis of accounting utilized in the preparation of the 2019 budget for the District is the modified accrual method. The District's 2019 budget includes projected revenues and expenditures for its general fund, water fund, sewer fund, conservation trust fund, and schedules for the sources and uses of capital and services impact revenues.

IMPORTANT FEATURES OF THE BUDGET

Revenue Derived From Property Taxes:

The District lowered the mill levy in 1990 by 2.000 mills. The District again temporarily lowered the District mill levy by another 6.585 mills in 1998 to the current 35.524 mills and continues to reduce cost and revise fees, as necessary. The District Board of Directors in their efforts to continue increasing levels of services without increasing the property owner's tax burden will maintain the reduced mill levy adopted in 1998 for 2019 and not ask the District voters for an increase.

The District's assessed value is \$17,500,540, which is an increase of \$29,640 over 2018. With a District property tax levy of 35.524 mills resulting in a total of \$621,869, which is \$1,053 more than the prior year.

The General/Water/Sewer funds reflect relatively no change from the 2018 property tax revenues to be received in fiscal year 2019 over those property tax revenues received by the District in fiscal year 2018. District electors removed the 5.5% statutory revenue limit applied to the expanded revenue base in May 2002 and approved retention and expenditure of revenues in excess of TABOR limits in May 1994. The District's mill levy at the time of the passage of TABOR was 42.109 mills.

Conservation Trust Fund:

The Board of Directors anticipates that funding from the Conservation Trust Fund (CTF) revenue will remain relatively constant from approximately \$7,500 - \$8000. These funds are expended through the Recreation Department of the general fund. The District will continue

with general operation and maintenance of existing facilities and exploration of additional recreational facilities.

ANTICIPATED PROJECTS

The Board of Directors anticipates Capital and/or replacement projects totaling \$144,000 in 2019 that represent 8.1% of the District's total budget. These funds are for continued road/water/sewer system construction improvement and replacement projects that will consume the majority of these funds.

The District will continue road construction and improvements in 2019 to be funded with service impact fees, non-operating and operating revenues. The District processed additional road construction/maintenance materials from its gravel pit in 2017. We should have at least one additional crushing project left with our own pit.

The District will continue updating the snowplows and equipment fleet and the budget continues to include funds to add or replace one (1) pickup in 2019. The District replaced the Loader Backhoe that is an essential piece of equipment to the successful operation and maintenance of District facilities/systems in 2015. The District utilized a governmental lease/purchase agreement for this acquisition. In 2017, the District purchased two (2) used snowplows and a dump truck/plow from CDOT auctions. Our grader is relatively aged and needs replacement. We are collecting cost information now on lease and/or lease to own options from heavy equipment vendors.

The District continues to work on updating the water master plan and evaluation of the water distribution system. The District developed an additional well (Well #4) within the existing water well field that was drilled in 2013 and was brought online in 2015. The District constructed improvements to the drinking water disinfection system in 2015 known as the raw water supply and disinfection project that was submitted to the State and approved late in 2014. The District replaced the pressure reducing station on Lake View Cr. in 2009, the Hillside Dr. station in 2010, Alpine Forest Dr. station in 2011, Pine Tree Dr. in 2012, Berry/Timber Dr. in 2014.

In 2017, there were plans to replace a PRV at East Pine Top. After careful consideration and evaluation, it was determined that a new PRV would better be suited and beneficial to manage excessive pressures on Blue Ridge Dr. that will be back fed from Hilltop Cr./Hillside Dr. The PRV was purchased with the 2017 budget and half of the needed pipe and fixtures were funded from 2018 budget. This two-year project began in 2018 and will continue into completion in 2019.

The District provides construction of water and sewer main line extensions with available funding on a Board approved per request basis as the construction of the infrastructure was not required by the County before lots were sold and the developer failed to complete the infrastructure. No new main extensions were scheduled over this two-year period; this allowed the district to divert finances into the water distribution infrastructure improvement project. In 2019, the District will consider new main extension requests for the following year.

The District completed construction of the wastewater treatment facilities upgrade and expansion project in 2007 and continues to make budgetary changes to the operational and maintenance line items due to increased costs to operate and maintain the new facilities in compliance with changing discharge permit regulations. The District was advised by the Colorado Department of Public Health and Environment in 2012 that due to their administrative changes the District's discharge permit would be renewed beginning in 2012 rather than at the expiration of the permit in 2014. In 2018, we submitted our Wastewater permit renewal. Wastewater lagoon systems do not remove ammonia effectively which is now a condition of the new permit and is based on two-year averages. The 2007 wastewater facility improvements anticipated this ammonia removal and includes treatment capabilities to meet the preliminary effluent limits for ammonia that were provided at that time. It is likely that phosphorus limit changes will also occur later and also make it more difficult to meet permit requirements. Should the plant be unable to remove the ammonia and any other elements effectively at the new permitted levels, the facility will have to be upgraded. We have not received results yet on our permit renewal and the State is apparently backlogged and delayed on processing renewals.

The District continues with sewer inspections, repairing problems to reduce unwanted water in the system, and working on problem areas that were identified from prior system surveys that, if funded, are expensed through the repair/maintenance line items of the sewer fund. In 2018, we completed a sizable and costly project to remove sludge from our lagoons.

The District acquired a large parcel of land next to Forest Lakes to provide more greenbelt area and to be utilized as an emergency means of egress through Bear Creek to County Road 501. Improvements will be spread over multiple years due to the amount of funding needed to complete improvements. Rough-cut roads have been developed that allow emergency egress during high fire danger seasons and signage has been installed. The road in this area was redirected slightly and road base was placed on the emergency evacuation route in 2018. More material will be added in 2019 from our own stockpiles.

All projects listed in the budget are subject to change based on conditions in effect at time of project review and approval. Not all projects undertaken by the District can be anticipated at time of budget adoption and other projects may be added or removed during the budget year as they are developed and/or needed through the supplemental budget process. The District utilizes contingency line items in the budget for unanticipated projects or expenditures that are undertaken during the year that were not anticipated at time of budget adoption. These projects are funded from fund balances, impact and/or capital reserves and unanticipated revenues that were not assured at time of budget adoption.

In Summary:

Approval by the Forest Lakes electorate of a TABOR refinement question presented to the Forest Lakes electors on the ballot in May 1994 and removal of the 5.5% revenue limit on the 2002 ballot has greatly improved the fiscal stability of the District. Without the voter approved changes, the District would not have survived the dramatic drop in property tax revenue due to decreasing values that began in 2012.

Total expenditures in the 2019 budget are 5.91% or \$111,434 lower than 2018 budget. Revenues are projected to be 5.7% lower than projected revenues for 2018. Currently we

are working on financial analysis and reviewing audit history to identify and evaluate relevant financial expenditure and revenue patterns to determine where changes may need to happen on budgeting and financial management.

We are working on some fee analysis to determine if/when rates may need to increase. There are plans to do more long range forecasting on capital improvements and any other upcoming costs that should be considered in future budget planning and fee structures. The District will make efforts to implement any fee increases with incremental changes over an extended period when possible instead of making large fee increases in a short period. Over the past years, some funds have not been self-sufficient and impact fees and tap fees generated from new building has not shown good growth or returns. These are some factors that are under consideration for future budget planning. Our reserves are in decent shape now, but good planning makes much more financial sense for the District's future financial position.
